

# THE INNOVATIVE GRINDING SYSTEM

#### **HYDROSTATICS**

- •X and Z guideways
- No stick-slip, no wear
- Good damping
- Ultra-fine correction options

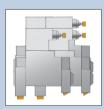

#### HYDROSTATIC B-AXIS

- Full-fledged NC axis
- Pre-tensioned hydrostatic guideway
- Direct drive

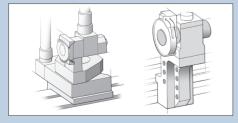

#### **C-AXIS**

- For non-circular workpieces
- For threads
- High-precision spindle bearing
- Direct drive
- High flexibility

# PLATFORM CONCEPT FOR MORE THAN 20 DIFFERENT WHEELHEADS

- Universal wheelheads
- Diagonal wheelheads
- Tandem wheelheads
- Various mounting positions

# **DRESSING SYSTEMS**

- Independent interface at table
- Pivotable unit for chucked work
- Rigid diamonds
- Form and profile dressers

#### PRECISION WITH HYDROSTATICS

Hydrostatic guideways and a strict separation of the machine base from the assemblies, generating heat or vibration, provide superb precision and productivity.

The excellent static and dynamic rigidity of the machine base permits a three-point set-up. The Kellenberger 1000 therefore has no particular requirements on the building's foundations. The hydrostatic guides for the longitudinal slide movement (Z-axis) and for wheelslide infeed (X-axis) provide the basis for the machine's extreme accuracy. Xand Z-axes movements are practically frictionless at all speeds. There is no stick slip; even the smallest increments of 0.1 µm can be traveled without a problem, so that the machine features measuring-machine accuracy.

# LARGE WORK SPACE — UNIQUE TABLE CONCEPT

The machine table has been considerably extended so it allows unmatched, optimal positioning of the grinding wheel and a larger travel distance, but also many machining options and application-specific configurations.

# **FUNCTIONAL MACHINE CASING**

The increased sheet metal thickness means even more process reliability, allowing larger internal grinding wheel diameter of up to 125 mm. With their large viewing windows, the generously-sized doors allow optimum control over the work process and make it easier to access the work space. The genuine glass laminated safety panes require very little maintenance.

# FUNCTIONAL DESIGN WITH HIGHLY PRECISE TECHNOLOGY

#### COMPACT AND MAINTENANCE-FRIENDLY

Elements such as the power supply, electrical cabinet, and a central connection point for lubricating coolant, water cooling system, and compressed air were all integrated into the casing. Service and maintenance doors for unimpeded access to machine components are integrated into the back.

## **OPTIMIZED ENERGY MANAGEMENT**

Performance-optimized central cooling system. Automated procedures for switching on and off. Energy-efficient low-pressure hydrostatics.

## **EASY COMMISSIONING**

The integrated transportation concept (hook machine) shortens commissioning times considerably.

#### MACHINE RE-COOLING SYSTEM

- Comprehensive cooling system with needs-based design (wheelhead & grinding spindles, direct drive, hydrostatics, electric cabinet)
- Increased flow rates at lower system pressure
- Active cooling principle for optimal temperature stability
- Minimized thermal drift, so smaller deviations on workpiece
- Hydrostatic oil cooled to ambient temperature
- Automatic tracking of surroundings, water cooler: Sensor in bed measures reference temperature of regulator

## **OPTIONS**

- Increased coolant pressure up to 10 bar
- Interface for fire extinguisher system
- Automatic door drive
- Replacement aid for grinding wheels and tailstock

## **CONTROL SYSTEM**

- FANUC 31i-B
- 19" Touch Screen

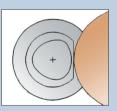

# X/C INTERPOLATION

- Cone Grinding
- Profile Grinding
- Dressing

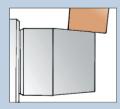

#### X/C INTERPOLATION

- Non-circular workpieces
- Thread grinding
- Jig grinding
- Groove grinding

#### X/Z INTERPOLATION

- Taper grinding
- Profile grinding
- Dressing

# **B-AXIS AND AUTOMATIC GRINDING WHEEL MEASURING SYSTEM**

#### HYDROSTATIC B-AXIS

- Pre-tensioned hydrostatic guide
- The direct drive is wear-free
- 180° swiveling in one second

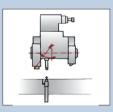

#### DIRECT DRIVE SYSTEM

- The water-cooled hightorque motor guarantees a high level of torque
- The rotary encoder is integrated in the absolute measuring system of the machine and requires no referencing

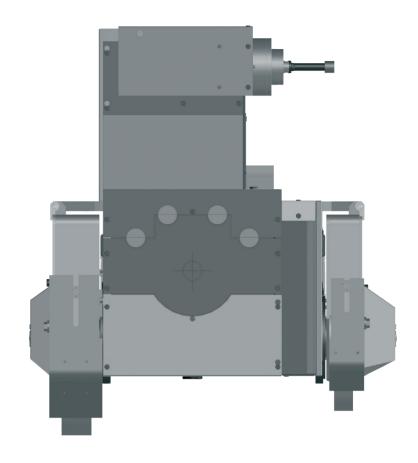

## **CLAMPING**

- The B-axis can be clamped in any position without any deformation
- The large dimensions of the clamps guarantee high clamping moment

#### **KEL-SET**

- Automatic grinding wheel measuring system
- EU patent No. EP 0542 674 BI
- US patent No. 5.335.454

# HYDROSTATIC B-AXIS

Full-fledged NC-axis with pretensioned hydrostatic guideway and direct drive.

The pre-tensioned hydrostatic is the basis for higher accuracy and better surface quality. Steps of 0,0001° can be traveled with ease.

#### **KEL-SET**

Automatic grinding wheel measuring system. Movements to the measuring ball and to the grinding wheels occur automatically, with their position information being stored in the control system. When swiveling the wheelhead into any angle, the positions of the grinding wheel edges are automatically taken into account.

# **ADVANTAGES FOR THE USER**

 Programming takes place with the actual dimensions according to the work drawings and independently of the swivel angle of the wheelhead

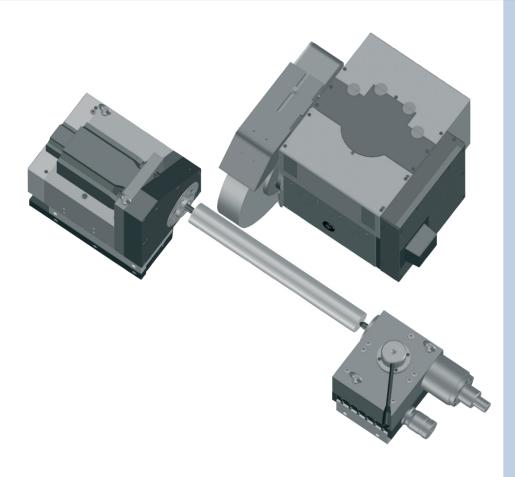

- No need for renewed calibration of the swiveled grinding wheel
- Simple and fast acquisition of the grinding wheel data when retooling the machine
- Integrated tool management for external, face and internal grinding

## WORKHEAD

Robust and rigid design on a solid base. Strong motor. Infinitely variable spindle speed. Airlock seals prevent ingress of dirt or water as well as the formation of condensation.

- Excellent roundness and dimensional accuracy thanks to pre-tensioned high-precision antifriction bearings
- Roundness of the workpiece dR  $\leq$  0.4  $\mu$ m ( $\leq$  0.016  $\mu$  inch) on chucked work
- Versatile in use
- Comes standard with fine adjustment for cylinder correction for chuck work
- ISO 702-1 spindle nose

# WORKHEAD, C-AXIS AND TAILSTOCK

# **OPTIONS**

- Roundness of the workpiece dR < 0.2  $\mu m$  (< 0.008  $\mu$  inch) on chucked work
- Positioned spindle stop

#### **C-AXIS**

The option of interpolating the X- and C-axes makes it possible to use the cylindrical grinding machine also for unround shapes such as polygons, free contours and eccentric forms. The rotary encoder with a resolution of 0.0001° is installed directly on the workhead spindle. The noncircular movement is superimposed on the grinding movements so that the grinding machine can use all the grinding cycles on unround grinding too, including the handwheel release for the X-axis.

# **TAILSTOCK**

The tailstock features a large and heavy design. The nitride-coated sleeve runs in sturdy ball-bush bearings.

- Excellent rigidity makes it possible to achieve high rates of infeed even with heavy workpieces
- Sensitive sleeve pressure adjustment
- Micro-corrector for quick and easy cylinder corrections
- Pneumatic relief for tailstock movement

# **OPTIONS**

- Hydraulic or pneumatic sleeve retraction
- Automated cylinder correction
- Enlarged travel, 79 mm (3.14 inch)
- · Reinforced design

# WORKHEAD WITH DIRECT DRIVE

- n I-1000 min-I with direct drive 200
   Spindel nose ISO 702-I, size 5
- n I-500 min-1 with direct drive 300
   Spindel nose
   ISO 702-1, size 8

#### WORKHEAD

- Standard, n I-1000 min-1
- Spindel nose ISO 702-1, size 5
- As desired, with fixed or rotating center

# **TAILSTOCK**

- Morse taper 4
- Retraction of sleeve
   49 mm (1.96 inch)

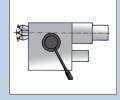

# SYNCHRONIZED TAILSTOCK

- With integrated sleeve
- Morse taper 4
- Retraction of sleeve
   49 mm (1.96 inch)

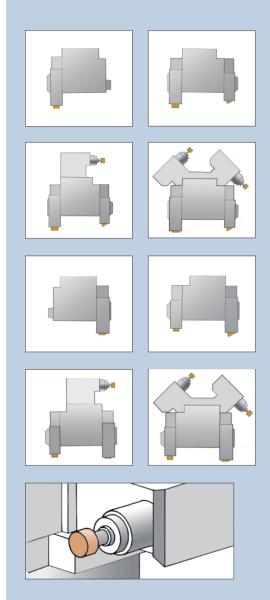

#### **MICRO-ADJUSTMENT**

- Adjustment range+/- 75 μm
- Optionally with automatic cylinder correction

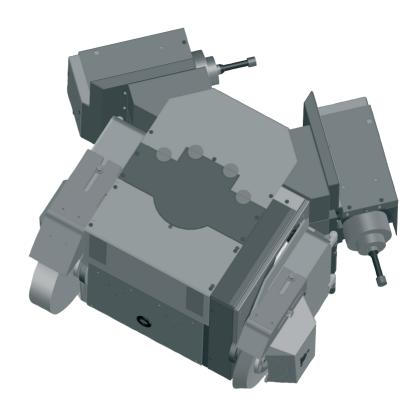

# **MODULAR WHEELHEAD VARIANTS**

## INTERNAL GRINDING ATTACHMENT

· High-frequency internal grinding spindle

# **UNIVERSAL WHEELHEADS**

- Motor output 10 kW (13.6 hp)
- Water-cooled precision-balanced drive motor
- Infinitely variable drive of OD and ID grinding spindles
- Hydrodynamic multi-surface spindle bearings
- Grinding wheel dimensions
   Ø 500 x 100 mm (20 x 3.15 inch)
- High-frequency ID grinding spindles

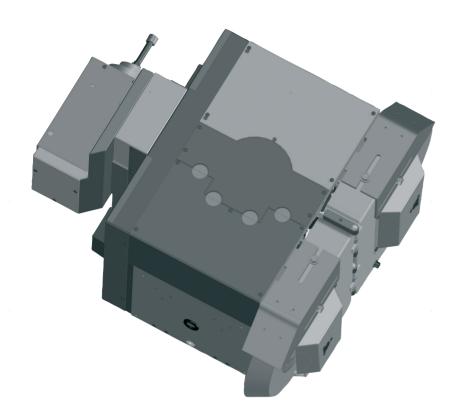

The universal wheelhead covers various user needs. In addition to external, face- and internal grinding, the use of two internal grinding spindles or the option of thread grinding or unround grinding are now increasingly in demand. Grinding in one setting allows shorter processing times and improves the quality of the workpieces considerably.

The new modular system makes it possible to supply the universal wheelhead to customer specifications, from a simple wheelhead with one tool to a configuration with up to four tools; see examples.

# DIAGONAL WHEELHEADS

- Motor output 2x 10 kW (13.6 hp)
- Water-cooled precision-balanced drive motors
- Infinitely variable drive of OD and ID grinding spindles
- Hydrodynamic multi-surface spindle bearings
- Grinding wheel dimensions 2x Ø 500 x 100 mm (20 x 3.15 inch)
- High-frequency ID grinding spindles
- Min. 2 OD grinding wheels
- Max. 2 OD grinding wheels and 2 HF ID grinding spindles

The diagonal wheelheads provide the option of rough and finish grinding in one setting. The additional use of HF ID grinding spindles also allows universal OD, face-and ID grinding.

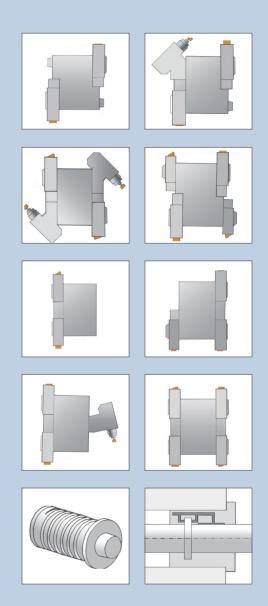

# **TANDEM-TYPE WHEELHEADS**

- Motor output 2x 10 kW (13.6 hp)
- Water-cooled precision-balanced drive motors
- Infinitely variable drive of OD and ID grinding spindles
- Hydrodynamic multi-surface spindle bearings
- Grinding wheel dimensions  $2 \times \emptyset 500 \times 100 \text{ mm} (20 \times 2.5 \text{ inch})$
- High-frequency ID grinding spindles
- Min. 2 OD grinding wheels
- Max. 4 OD grinding wheels or 2–3 OD grinding wheels and I HF ID grinding spindle

The tandem-type wheelheads are designed for the possibility of carrying out straight and angular infeed operations in the same setting. With an additional HF internal grinding spindle it is possible to also process internal grinding work. The ideal equipment for these wheelheads can be determined by the nature of the workpieces to be ground.

# HF ID GRINDING SPINDLES

- MFM 1224-42
- MFM 1242-60
- Frequency converter up to 3000 Hz

WATER-COOLED PRECISION-BALANCED DRIVE MOTORS

HYDRODYNAMIC MULTI-SURFACE SPINDLE BEARINGS

# FANUC CONTROL SYSTEM 31i-B — WITH KELLENBERGER HMI

The BLUE Solution user interface from KELLENBERGER has the central focus on simple and intuitive operation. All interactions are carried out by gestures on the 19" touch display. The latest generation of a reliable FANUC 31i-B control runs in the background.

## **BLUE SOLUTION**

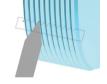

The user interface was developed explicitly for grinding by our specialists in cooperation with customers. BLUE Solution supports users regardless of their level of experience in all important steps from setup to production.

OBJECT GUIDE	EASIEST PROGRAMMING	FAST GRINDING RESULT
INTUITIVE OPERATION	KNOWLEDGE OF ISO IS NOT NECESSARY	LESS TRAINING COSTS
TECHNOLOGY COMPUTER	MACHINE SUGGESTS MACHINING PARAMETERS	SAFER PROCESS
REGRINDING CYCLE	EASY TO CORRECT	MINIMIZATION OF WASTE

# **BLACK CAM SOLUTION**

With the additional BLACK CAM Solution software, NC programs for grinding and dressing of profiles and threads can be generated, simulated and analyzed.

The CAD-CAM software supports the structured creation, processing and management of all documents belonging to a workpiece.

CAD DATA IMPORT	FAST PROGRAM CREATION	HIGH PRODUCTIVITY
3D PROGRAM ANIMATION	VIRTUAL PROGRAM CONTROL	MINIMIZED RISK OF ERRORS
PROJECT MANAGEMENT	MANAGEMENT OF ALL PARAMETERS	FAST REPRODUCTION

# **INDUSTRY 4.0**

The Security Interface ensures communication according to the highest IT security standard between the machine and the production network.

The optional Remote Diagnostic module simplifies efficient diagnosis in case of service and thus reduces downtimes.

The machine is prepared for Industry 4.0. With the ComGateway, which has a standard OPC-UA server, extensive information on process and machine status can be exchanged.

# HARDINGE WORLDWIDE

Hardinge is a leading international provider of advanced metal-cutting solutions. We provide a full spectrum of highly reliable CNC turning, grinding, and honing machines as well as technologically advanced workholding accessories.

The diverse products we offer enable us to support a variety of market applications in industries including aerospace, agricultural, automotive, construction, consumer products, defense, energy, medical, technology, transportation and more.

We've developed a strong global presence with manufacturing operations in North America, Europe, and Asia. Hardinge applies its engineering and applications expertise to provide your company with the right machine tool solution and support every time.
